About Us

Jet Access is the first vertically integrated, fully transparent full-service aviation management company in the industry. At a national scale, Jet Access conducts Part-135 charter, Part-91 management, FBO management, international brokerage, Part-145 repair stations, and Part 61&141 flight training with collegiate and privately financed programs.

Our team consists of highly experienced, qualified, knowledgeable, and results-oriented professionals. We create tangible value for each aviation vertical we manage - it's what makes us a genuine full-service provider. It's what allows us to provide value to our clients beyond cutting costs and streamlining operations.

Flight Training

Jet Access Flight Training (JAFT) is a one-source flight school for all training needs from complete accelerated commercial programs, aviation degrees, and private pay-as-you-go training.

JAFT's Accelerated Commercial Program is a privately financed program that can be accomplished in approximately 12- months, including multi-engine and instructor ratings. Students can finance testing fees, supplies, and extra funds on account. Jet Access provides the highest quality program while using modern technically advanced aircraft and includes about 70 more flight hours than competitors, while lower cost than industry average.

JAFT's Accelerated Commercial Program students can also enroll in Purdue University Global (with a 20% tuition discount.) Upon earning their Private Pilot Certificate, they will continue their flight training, take online classes with Purdue, earn an instructor position with Jet Access, and build their 1,500 hours. Zero to 1,500 hours, with a degree, in about 2 to 3 years!

JAFT students are eligible to earn positions as flight instructors. After instructors build experience, they can then become a charter pilot for Jet Access while earning high-salaries, benefits, and phenomenal lifestyle; approximately 10 years faster than an airline career's comparable pay and lifestyle. Because Jet Access is the only national scale vertically integrated aviation enterprise, our pilots see far better job security and quality of life than industry norms. Upon reaching 1,500 hours, our students will qualify for an airline position, and are not limited to a Part-135 charter.
